10 REASONS TO UPGRADE TO PRINERGY 11.0

1

IMPROVED SYSTEM STABILITY

New OS Support for WINDOWS 2022 and Mac 14. Upgrades to APPE RIP and Preflight+.

2

CONTROLLED ACCESS

Data visibility controlled by permissions for Group Rights in Active Directory for Jobs, Process Templates and RuleSets.

3

UPDATED PROCESSING TECHNOLOGY

Corretto VM replaces Java VM for improved reliability and security.

4

CONNECTIVITY TO PROSPER PRESSES

Direct connection to the PROSPER ULTRA 520, 7000 Turbo and 6000 Presses.

5

RULES-BASED AUTOMATION (RBA) ENHANCEMENTS

Improved usability with Plate Remake Action and character limitation extension to 93 for PRINERGY job names.

6

IMPROVED USABILITY FOR VPS+

Navigation, Inventory and Info panels are separated into resizable windows, and ability to set Opening Zoom magnification and Drag & Drop (Add file) to current open file set.

7

SEAMLESS CURVE TRANSITION TO COLORFLOW

Import Harmony curves to COLORFLOW with ink limiting curves (solid cutback).

8

IMPROVED PREPS USER INTERFACE (UI)

Support for High Resolution Mode on Retina Display.

9

BACKUP FLEXIBILITY

Configure specific folders within the AraxiPreps share for greater flexibility.

10

ENHANCED PERMISSIONS FOR PACKAGING LAYOUT AUTOMATION (PLA)

Improved security with controlled System Preferences access for non-Admin PLA users.
